

Solution 2

The comment tag is used to insert comments in the source code comments are not displayed are not displayed in the browser. You can use comments to explain your code , Which can help you when you edit the source code at a later date.

Solution 4

Tags are the starting and ending parts of an HTML element. They begin with < symbol and end with > symbol. Whatever written inside < and > are called tags. Eg h1 tag, img, br, hr, Element - it consists of a starting tag, content, and an end tag.

Eg - <h1>Heading tag of html</h1>

Solution 5

All HTML documents must start with a <!DOCTYPE> declaration.

The declaration is not an HTML tag. It is an "information" to the browser about what document type to expect.

In HTML 5, the declaration is simple:
